

**Klinik im LEBEN**

Integrative Naturgemäße Medizin

## **Facing life with expertise**

Europe's leading hospital for natural,  
biological and integrative medicine

**Individually arranged diagnostics  
and therapy since 1998**

## Uniting natural and scientific medicine

Medicine im LEBEN (meaning: "in LIFE") unites alternative, centuries-old medicine with general "scientific medicine" to a natural, biological medical concept of modern and by now recognized diagnostic and therapeutic methods. It treats the human being based on its biology and respects the unity of body, mind and soul. Our guidelines are thankfulness for the gift of life, respect for the limits of feasibility and the use of innovative solutions.

This medical concept at Klinik im LEBEN supports patients by including the human touch, affection and natural health-consciousness into the treatment course. This is our contribution towards a sustainable and responsible healthcare.

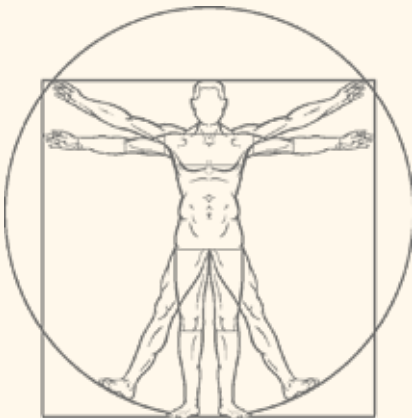

# Human unraveling

Connect to yourself and your  
innermost truth

Here at Klinik im LEBEN each patient is treated as a unique human being with its own individual nature.

All levels of the patient's life – meaning the level of the soul, the mind, and the body, are at the core of the individual analysis and diagnosis which pave the path for a personalized therapy concept. This unique approach is what distinguishes Klinik im LEBEN in the sphere of biological medicine.

On the professional level, we consider our natural biological medicine at Klinik im LEBEN the integrative link to standard medicine. The focus hereby is to reduce side effects (e.g. after oncological treatments) or to increase the efficacy of standard therapies (e.g. pain therapy), and to assist patients on their individually chosen path of healing.

# Ideo-logical

The whole human being –  
to be at the center of the whole

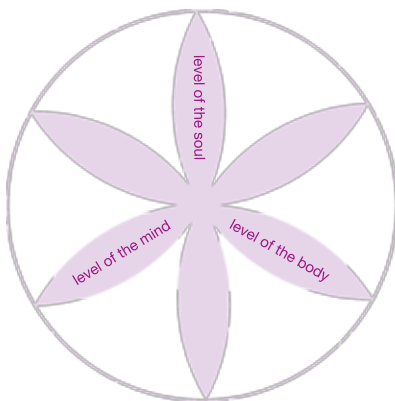

The holistic and individual therapy concept of Klinik im LEBEN is based on three principal pillars according to Dr. Reuter:

## 1. Analysis of the status quo

Individual assessment and evaluation of the status quo of the entire system

## 2. Diagnostics:

Holistic diagnostics on three levels: the realms of the material body, mental energy, illuminating soul followed by identification of primary targets for therapy

## 3. Individual therapy steps:

- Transformation of the cause of disease into a motivation to heal
- Drainage of negative emotions and substances
- Activation of self-healing forces (of the metabolic, immune and nervous system), stabilization on all three levels

## Holistic diagnostics and therapy

At Klinik im LEBEN, we exclusively use tested biological therapies to the benefit of our patients. Our extensive spectrum of diagnostic and therapeutic methods allows us to find the optimum path towards healing together with you. We take time to treat the whole human being and treat all the levels of being holistically.

### Specialties of Klinik im LEBEN

# Value: added

Quality and competency  
at its best

We practice biological medicine with the highest possible competency and professionalism. The ISO-9001-certificate by TÜV Rheinland and extensive educational and therapeutic liabilities according to the guidelines of the medical association im LEBEN ensure the uniquely high-grade quality standard in the area of biological medicine.

Distinguished 2015 by the  
INTERNATIONAL SOCIETY OF  
MAYR DOCTORS

## Experience and permanent refinement

We take responsibility for contributing to a society with sustainable health care. To secure our goal of perfecting biological medicine, we join forces with other innovative companies, organizations and specialists in order to exchange experiences and information on the newest research results.

Our sense of high quality human touch, intelligent solutions and economic factors increases confidence in biological medicine. This is our formula to achieve positive results in treatment.

# Heart felt

Fine feel for  
precious togetherness

The atmosphere at Klinik im LEBEN radiates with heartfelt care and affection. Patients and staff meet each other on the human level. They all are companions and co-creators with strong devotion and mutual inspiration.

Klinik im LEBEN is a place where life and all its diversity are at the center of attention, a place where past and present experiences may unfold. During your stay, an affectionate and well-trained team of nurses and caregivers and a team of doctors with qualifications in many specialties will be at your side.

Medicine im LEBEN stands for honesty, self-determination and a trustworthy handling of values and responsibility which are consciously appreciated and implemented daily.

# Well being

A place of conscious and  
healthy lifestyle

Klinik im LEBEN is situated in the historic town of Greiz, known for its park and castles. We are strongly connected to the region and the people and welcome you to a landmarked art nouveau villa.

Architecture and interior design are arranged to meet the natural needs of the human being: protection and a feeling of security, life and encounters, quietude and inspiration.

Our guesthouse im LEBEN offers you healthy living conditions with natural, pollutant-free materials and materials tested to pass high standards of building biology. The interior is anti-allergic, relaxation and sleeping areas are free of electric smog.

The healing effect of our therapies is supported by a well-balanced diet to benefit your health. Organic foods aid your body in regenerating. Especially composed diets in case of lactose or fructose intolerance or celiac disease are available on request.

# Quality of life

Joined together for  
sustainable health

In order to maintain our high standard of quality and our wide spectrum of health promotion, we benefit from an extensive network of partners in the region:

## **Guesthouse im LEBEN – heal in harmonious surroundings, natural living as a cure**

Lodging and catering at Guesthouse im LEBEN consistently complement our health concept. The atmosphere encourages relaxation and supports the healing process.

## **Health shop im LEBEN – Conscious healthy lifestyle**

The online health shop im LEBEN offers specific information of integrative biological medicine and a selection of vitalizing products. These can also be obtained on location in the Vital Shop im LEBEN and in the organic store LEBENSquell ("spring of LIFE").

## **Academy im LEBEN – integrative biological medicine**

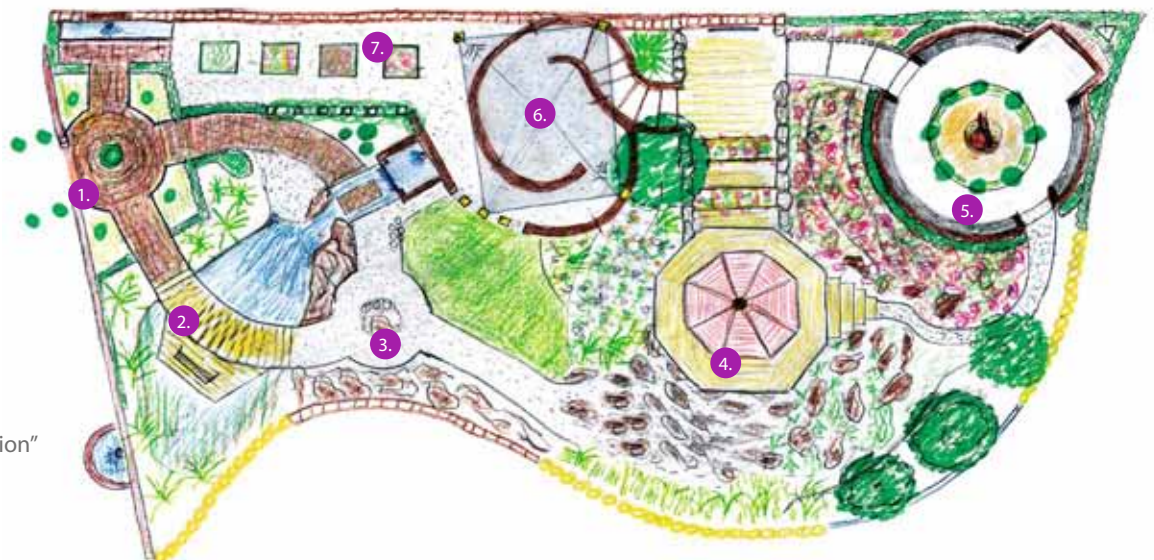

The Academy im LEBEN is an institution offering advanced training for naturopaths, doctors, therapists and interested parties. The promotion of the exchange of new insights allows to continue development and networking.

# Refuel your energy

Experience awareness  
in the “Garden of life”

Our “garden of life” is a special place of conscious realization. It is designed alongside the four basic elements: fire, earth, air and water. The conscious realm of human life can be experienced in its multi-faceted aspects at different “islands of awareness”. The visitor is invited and challenged to act and react directly and indirectly. Liberties are to be discovered here and obstacles to be overcome.

Everything positive in life is represented figuratively in the concept of this garden in order to become aware of a positive life.

1. "Island of grounding"
2. "Space of joy of life"
3. "Island of decision"
4. "Hill of orientation"
5. "Space of transformation"
6. "Space of peace"
7. "Garden of yield"

Entrance – “Island of grounding”

“Spaces of transformation”

“Garden of the yield”

Landscape in the Vogtland region

Upper castle of Greiz

The river Weiße Elster with the lower castle of Greiz

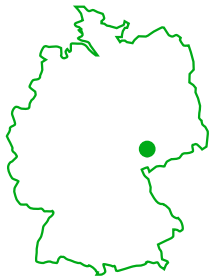

# Fill up vitality

Reflection and healing  
amidst a moving world

Nature, a vast landscape of rolling hills and centuries-old traditions shape the Vogtland region of Thuringia. Various leisure and relaxation facilities at the clinic and in the surroundings complete your stay.

You could e.g. easily explore the historic center and the impressive castle on foot. The multitude of neoclassical buildings reminds of a rich and meaningful past. It is the natural surroundings that especially influence the people, the many small settlements with their traditions, vast meadows, lakes, forests and fields add quality of life to the area.

Warmth and honesty mark the locals. This feeling of nativeness supports many guests in learning to see themselves again and connect to their roots. This is what makes the people of Greiz and the staff that looks after their patients at Klinik im LEBEN caringly so lovable.
